Soft Tissue Management during and after bone augmentation procedures

Abstract:

Soft tissue management plays a crucial role in the success of guided bone regeneration (GBR) procedures and long-term peri-implant health. This presentation will focus on the surgical techniques for optimal flap management during GBR, emphasizing flap design and tension-free closure to enhance healing and prevent complications. Additionally, it will highlight the importance of achieving adequate keratinized tissue around implants to support functional and esthetic outcomes.

Strategies to ensure sufficient soft tissue volume and quality at the end of the regenerative process will also be discussed. The session aims to provide clinicians with practical insights to optimize both surgical and long-term results in oral rehabilitation.

Fabrizio Colombo

• CURRICULUM VITAE

He graduated in Dentistry at the University of Milan in 2004.

He got a post-graduated in Oral Surgery at the same University and a post-graduated in Implantology and Implant Prosthetics at the University of Brescia. He has attended many educational courses in Italy and abroad. He is the author of articles published in national journals and abroad and author of posters presented at national and international congresses. He is speaker at cultural events (congresses and theoretical-practical courses) concerning oral surgery, regenerative surgery and implantology in Italy, Europe, Asia, Middle East and United States of America. He is the winner of the "Poster Award - Advanced Clinical Cases" at the I° International Congress IAO (Italian Academy of Osseointegration) 2017 (Milan). He is the winner of the international contest MINEC (Megagen International Network of Education & Clinical Research) at the 15th international Megagen symposium 2022 (Seoul). He is an active member of IAO (Italian Academy of Osseointegration). He is attending the Emerging Leader Program 2022-2023 sponsored by FOR ORG (Foundation for Oral Rehabilitation). He practices consultancies dedicating himself mainly to oral surgery, periodontology, implantology and implant prosthesis. Starting from 2021, he is also the owner of a dental office in Lecco (Como-Italy).
